

Dear Parents of Students on IEPs,

Below you will find links to printable and digital resources that you may use with your child. ***This is in addition to the content/grade level resources on the district home learning website.***

You are encouraged to use any of the grade level resources the district has provided, and choose any level of material or activity that is right for your student. If you are unsure which level is appropriate, feel free to try a few different things, or take a look at your student's most recent IEP for present levels of performance. For example, if you have a 4th grade student who is working at grade level in math and science, but below grade level in reading, you can choose a lower level when you access reading content.

If you need help navigating which activities might be appropriate for your child, regardless of their current skill level, feel free to email any of the following staff members...
