

Dear Mary Woodward Community --

We wanted to share an update on the exciting bond work upcoming at Mary Woodward Elementary School. I have had a number of conversations with parents regarding this project.

For those that may be unfamiliar, this work will include:

- New Main Office at the front of the school with secure vestibule entrance
- New Counseling Office and renovated Classroom in location of former Main Office

While construction on our school will not begin this summer, work will continue in preparation for our project to commence. Here are some recent and upcoming project milestones:

- Design process was resumed after a one-year hiatus
- Drawings are in the stages of being finished to secure permitting
- District staff is currently assessing recent requirement changes for the Oregon State Seismic Rehabilitation Grant Program and determining the feasibility for submitting Mary Woodward for a future grant application round

For more information on our project and others, please visit the bond website: [bond.ttsdschools.org](http://bond.ttsdschools.org). and should you have any questions on the project and upcoming construction at our school, please don't hesitate to give me a call.

Sincerely,

Jerry Nihill  
Principal
